

Eco-Friendly

WATER BASED ADHESIVE

Non-Toxic

SINOGRACE
The Chemical Company**SA-232H****Water based pressure adhesive for paper materials****DESCRIPTION**

SA-232H is an adhesive specially designed for reverse and various gravure coaters at higher converting speeds, for the production of general purpose paper labels or other pressure sensitive articles.

KEY FEATURES

- ❖ Non-yellowing
- ❖ Wider application range
- ❖ Very good bleeding resistance
- ❖ Very good paper-aging resistance
- ❖ Excellent balance of tack and shear
- ❖ Higher productivity through high speed converting
- ❖ **Good temperature and aging resistance**

TYPICAL PROPERTIES

| | |
|-------------------------|------------------------|
| Appearance | Milky white liquid |
| pH | 6.0-8.0 |
| Solid content | 54±1% |
| Type of emulsion | Anionic |
| Viscosity (25℃) | 200-300mPa • s |
| Density (20℃) | 1.02 g/cm ³ |

APPLICATION

- ❖ General purpose paper labels
- ❖ Various single copper, mirror copper paper, mirror wet paper, thermal paper, mirror aluminum paper, aluminum foil label and advertising materials
